The "Byupo" cannot be destroyed by the side walls. This is particularly useful in avoiding enemy missiles and traps.

OPTION

The Option Item gives the "Byupo" extra fire power, turning the normal shot into a multiple-fire gun and tripling your fire power. This option also protects you from oncoming missiles and can be used to ram your enemies.

NORMAL SHOT

Your fundamental mode of attack. Press the B button to shoot single, or rapid-fire shots. Using options releases special attacks. By repeatedly pressing the B button, you can use rapid-fire shots.

POWER WAVE

More powerful than the normal shot, you can destroy various enemies with one blast. Push the B Button down to store energy then shoot by releasing the button. Note: While you are storing your power, you cannot shoot.

●POWER LEVELS

There are 3 levels of intensity to your Power Wave. These levels are determined by the amount of time you press down the B Button. Use these levels to your best advantage when confronting the enemy.

Use your Option Careful and Watch Out - Some Enemies are so strong that even full Power Can't Wipe Them Out!

BOMBING

Bombs are the quickest way to destroy your enemies. Release your bombs by pressing the A or C Button. Each bomb has its own strong point. To store bombs, you must take the items that appear on the screen. At any one time, you can only store three bombs, taking a fourth will cause you to lose the bomb on the far left side.

THE FIRE BOMB (RED)

Creates a wall of fire in front of your ship. Toasts anyone who touches it.
